TITLE : AUTOMATIC ELECTRONIZED
 DOCUMENT REDISTRIBUTION
 DEVICE IN WORK FLOW SYSTEM

ABSTRACT : PURPOSE: To provide an automatic electronized document redistribution device capable of redistribution control corresponding to the features of documents, the redistribution control utilizing time information and flexible route rule management.

CONSTITUTION: This device is provided with route rule storage devices 5 provided in respective node terminals on a route for storing the header part of the distributed document and route information for redistribution set by the contents of text as rule data, an analysis device 3 for analyzing the distributed document and collating the analyzed result with the rule data and a route operation device 4 activated by the analysis device 3 for adding header information for the redistribution to the header part of the distributed document based on the rule data and the redistribution control corresponding to the features of the distributed document is performed.
